Issue No:	A							
Date of Issue:	04/11/2022							

At Nautic Engineering Ltd, we pride ourselves on providing flexible manufacturing solutions to our customer's requirements.

In order to do this, we put our commitment to quality at the heart of everything we do.

Our quality policy demonstrates our commitment, and it is clearly defined, communicated and understood by all members of our team.

We have a fully documented Quality Management System of which quality conforms to all aspects of ISO 9001:2015, and our Quality Management System Manual specifies our approach, our policies and procedures and provides a framework for setting our objectives and how we aim to achieve them.

It is appropriate to the purpose and context of Nautic Engineering Ltd and supports our strategic direction.

As the Managing Director of Nautic Engineering Ltd I take accountability for the effectiveness of our Quality Management System, and I am committed to its continual improvement.

I will engage, direct and supporting the members of my team, to play their part in contributing to its effectiveness, to promote improvements and learn from our shared experiences.

This quality policy will be available to relevant interested parties and will maintain it as documented information.
